

Your TV, But Better: 2.1 Active Soundbar with Wireless Subwoofer

The Episode 2.1 Active Soundbar with 8" Wireless Subwoofer adds stunning sound to your TV! Replacing your undersized factory speakers, this system delivers immersive sound so you can enjoy shows, movies, and music to the fullest.

Scientifically Engineered Sound

This 100-watt soundbar with its 80-watt sub is built using scientific principles on sound to deliver true and accurate audio that's pleasing to the ear.

Simple to Set Up, Easy to Use

This system connects directly via HDMI (ARC), optical, or analog, and the factory-paired wireless sub can be moved anywhere within 30-feet of the soundbar for hassle-free daily use. It also has Bluetooth built in!

Perfect for Gaming Too!

Enhance your gaming experience with ease! It's high-performance build and sleek design make this the perfect system to immerse yourself in your favorite worlds like never before.
