

Description

At less than 4" deep, Leon's Aaros 8" subwoofer redefines the possibility of large bass from a small enclosure. Soundly constructed to prevent unwanted resonance, this in-wall subwoofer is ideal for Living Space Theater applications where no floor space is available for a traditional subwoofer. With color-matched perforated metal, easily installed pre- or post-construction, and paired with Leon's 1,000W subwoofer amplifier, the A3-IW subwoofer stands out by blending in.

Recommended with Hz44UX, Pr44UX, v44UX

Key Features

- 8" subwoofer provides articulate, precise bass
- Cabinet design is less than 4" deep to fit into any in-wall application
- Paired with Leon's 1,000 watt Class A/B amplifier for deep, controlled bass
- Custom painted metal grills available to match any color
- Fully-sealed enclosure produces tight, accurate bass response
- Solid MDF, handcrafted in the USA
