

Description

Leon's Axis Pro Design in-ceiling speakers provide the perfect mix of flexibility and performance. Featuring premium, full-range sound Axis Pro Design provides exceptionally detailed reproduction of vocals and music—ideal as primary speakers in conference or presentation rooms, or as sound reinforcement for background music in distributed audio systems. And with UL-listed, plenum-rated steel back cans and 70-volt transformers, Axis Pro Design is suitable for any commercial application.

Recommended with Hz500, Pr500, ACS10-UT

Key Features

- 8" fiberglass cone woofer and 1" articulating Tetron-dome tweeter provides premium, full-range sound and maximum coverage
- UL-listed with plenum-rated steel back cans and 70-volt transformers
- Available with either a square or circular magnetic grill (ships standard with circular grill)
- Grills can be custom painted to match any color code or paint swatch
- Available with new construction brackets
- Perfect for public address, background music, or as sound reinforcement for distributed audio systems
- Tile bridge available
