

IR OMNISUB 10

Positioned between the small OmniSub 8 and the larger OmniSub 12, the OmniSub 10 delivers great bass performance in a compact size. A proprietary 10", long-excursion driver is used in conjunction with a 300 watt Class D amplifier. The amplifier technology retains the sound quality of traditional, hot-running Class AB amplifiers, while running efficiently and cool.

Features include signal-sensing power-on, volume, crossover and phase adjustments and both line level and speaker level inputs. Triad's new OmniSubs set the standard for performance, features, and value. Controls are easily accessible from a panel behind the grill. Triad's new OmniSubs provide excellent performance at a "value" price. All Triad OmniSubs come in an attractive black finish with black grill.

Category: Subwoofers

Tag: InRoom

Features

- Compact Design.
- Built-in 300 watt class D Amplifier.
 - signal-sensing power-on
 - volume level
 - crossover
 - phase adjustment
