CORE 1 Rack–Mount Kit
## Installation Guide

Box contents

- C4–CORE1–RMK   Control4 CORE 1 Rack–Mount Kit

Description

The CORE 1 Rack-Mount Kit makes it easy to install the Control4 CORE 1 Hub and Controller in an equipment rack. A removable face plate means this shelf can hold one or two controllers with a clean, finished look. A retention bar secures the controller(s) in place, and the rear of the shelf includes metal loops for convenient cable management.

Install the Controller(s) in the Rack Shelf

1. Loosen (but do not remove) the lock screw, until you can lift the retention bar up as far as it can go.
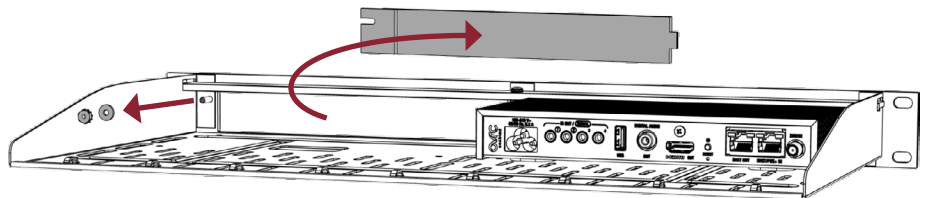

2. Lift the retention bar and slide the CORE 1 into position. Ensure the front of the CORE 1 fits flush with the face of the shelf.

## Install a Second Controller (optional)

3. Remove the lock nut and washer that secures the faceplate. Remove the faceplate.

4. Slide the second CORE 1 into position (just as you did in step 2). Ensure the front of the second controller is also flush with the face of the shelf.

Secure the Controller(s)

5. Lower the retention bar so it sits in the grooves on the CORE 1 Controller(s). Tighten the lock screw. Check that the controller(s) cannot move.
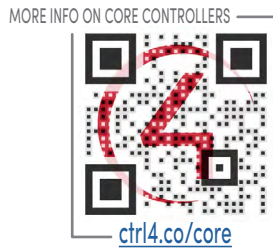

Install the Shelf into the Rack

Make all necessary connections for the CORE 1 controller(s), then insert the rack shelf and secure with rack screws (not included).
